DETAILED ACTION

Receipt is acknowledged of the amendment filed 04/08/2009.

The amendment overcomes the rejection under 35 USC 112, first paragraph.

The following is a new rejection of the claims:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 6, 8-12, 15 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claim 1, applicant claims "a first region having a drug incorporated therein", but makes no mention of the polymer also included in this region. Clarification is requested.

With regard to the second region described in claim 1, the region comprises "a polymer and a substance". However, at page 13, lines 20-21; page 14, lines 1-2 applicant refers to a "material". Clarification is requested as to whether the "substance" of claim 1 is actually the "material" described in the specification. Applicant is further requested to use language from the specification in further defining what this material is in the claims.

With regard to claim 9, applicant sets out a coating which contains the bioactive, a polymer and a "substance". (The issues regarding "substance" set out above pertain to this claim as well.) No support can be found in the original specification for one layer containing all three components. Clarification is requested.
